

# About **CORONAVIRUS**

**SYNOPHIC**  
WORLDWIDE

There's only **ONE** thing you need to understand about how a coronavirus

# **S P R E A D S**

## The Virus Spreads...

When the droplets of sick person gets into a healthy persons eyes, nose, mouth

## Avoid Infection...

Do not come in close proximity with people who are sick (coughing/sneezing/fever)

Keep your distance.  
2m to 0.5 m

Keep your distance. 2m to 0.5 m will keep you safe from large droplets.

**OR**

Give them a Mask.  
They Can Cough/sneeze into it

And **IN GENERAL**, it's a good idea to avoid crowds, because you don't know who might be sick.

Maybe She's not sick, just protecting herself

People who are infected can show no symptoms, but are still infectious

However, sometimes a sick person's saliva can get on other things...

And if you touch any of these things by accident,

and then touch your face,

or your loved ones face

**YOU MIGHT ALL FALL SICK**

Virus can last for up to...

and the only effective way to get rid of them is to wash them off soap.

HOURS on objects

# Which is why it is also good follow these 5 PRECAUTIONS

Wash your hands **THOROUGHLY** with soap and water for at least **20 SECONDS** after touching

**And Finally,  
Seek Medical Advice if you  
are sick**

Don't wear the mask for more than a day

Bacteria grows on the insides of your mask if you wear them too long

Also, don't touch the outside of mask if you can

If you did, don't worry, just wash your hands with soap after

Cover your cough with a disposable tissue or use mask and discard them immediately in a waste bin

Avoid touching your **EYE, EARS** and **NOSE**

Use a Serving Spoon

Avoid coming into contact with people who are sick or share the **PERSONAL ITEMS, FOOD, UTENSILS, CUPS & TOWELS**

Every one gets their own towel

# STAY SAFE EVERY ONE!

Catch It

Bin It

Kill It
